

DVD and CD-ROM Included
Run or install 18 different Linux distributions
from the multi-boot DVD and CD-ROM!

Christopher Negus

Linux[®]

2010 Edition

Boot up to Ubuntu[®], Fedora[®],
KNOPPIX, Debian[®],
openSUSE[®], and 13
Other Distributions

Start up a Linux desktop
or server computer

Migrate easily from
Windows[®] or Mac OS[®]

Try tons of Linux apps,
then install to hard disk

Bible

The book you need to succeed!

Linux[®] Bible

2010 Edition

**Boot Up to Ubuntu[®], Fedora[®],
KNOPPIX, Debian[®], openSUSE[®],
and 13 Other Distributions**

As always, I dedicate this book to my wife, Sheree.

About the Author

Chris Negus has written or co-written dozens of books on Linux and UNIX, including Red Hat Linux Bible (all editions), CentOS Bible, Fedora and Red Hat Enterprise Linux Bible, Linux Troubleshooting Bible, Linux Toys and Linux Toys II. Recently, Chris co-authored several books for the new Toolbox series for power users: Fedora Linux Toolbox, SUSE Linux Toolbox, Ubuntu Linux Toolbox, Mac OS X, and BSD UNIX Toolbox.

For eight years Chris worked with the organization at AT&T that developed UNIX before moving to Utah to help contribute to Novell's UnixWare project in the early 1990s. When not writing about Linux, Chris enjoys playing soccer and just hanging out with his family.

Currently, Chris is employed by Red Hat, Inc. as a Linux instructor. He teaches classes and gives exams to those seeking Red Hat Certified Engineer (RHCE) and Red Hat Certified Technician (RHCT) certifications.

Acknowledgments

I consider anyone who has contributed to the free and open source software community to be a contributor to the book you are holding. The backbone of any Linux distribution is formed by the organizations that produce the distributions, the major projects included in Linux, and the thousands of people who give their time and code to support Linux. So, thanks to you all!

I'd like to acknowledge several contributors for their participation in previous editions. Wayne Tucker originally wrote the chapters on Debian, LAMP servers, and mail servers. Bill von Hagen has contributed updates to the SUSE, Yellow Dog, and Ubuntu chapters. Warren Wrostek served as technical editor to this edition. Thanks to the folks at Wiley for helping me press through the project. Sara Shlaer did an excellent job helping me stay on track as I balanced my work on this book with my new full-time job with Red Hat. Katie Wisor shepherded the book through the production process. Thanks to Margot Maley Hutchison and Maureen Maloney from Waterside Productions for contracting the book for me with Wiley.

And finally, special thanks to my wife, Sheree. There's no way I could do the work I do without the solid support I get on the home front. I love you, and thanks for taking such good care of Seth, Caleb, and me.

Contents at a Glance

Introduction	xxv
Part I: Getting off the Ground with Linux	1
Chapter 1: Starting with Linux	3
Chapter 2: Linux Projects, Activities, and Careers	15
Part II: Running a Linux Desktop	33

Introduction	xxv
---------------------------	------------

Part I: Getting off the Ground with Linux	1
--	----------

Chapter 1: Starting with Linux	3
---	----------

Taking Your First Step	4
What comes in Linux systems?	4
What do you need to get started?	5
Starting right now	6
Understanding Linux	10
What's So Great About Linux?	13
Summary	14

Chapter 2: Linux Projects, Activities, and Careers	15
---	-----------

Making Things with Linux	16
Linux in outer space	16
Linux in gadgets	17
Linux in projects	19
Getting Involved with Linux	21
Joining a Linux User Group	22
Joining Linux communities	22
Companies and groups supporting Linux	22
Keeping Up with Linux	23
Major Linux projects	24
Exploring Linux distributions	26
Linux in the Real World	27
Linux in schools	27
Linux in small business	28
Linux in the enterprise	30
Becoming a Linux Professional	30
Summary	31

Part II: Running a Linux Desktop	33
---	-----------

Chapter 3: Getting into the Desktop	35
--	-----------

Understanding Your Desktop	35
Starting the Desktop	36

Contents

Boot to the desktop.....	36
Boot to graphical login.....	37
Boot to a text prompt.....	39
K Desktop Environment.....	40
Using the KDE desktop.....	41
Managing files with Dolphin and Konqueror.....	45
Using the Dolphin file manager.....	45
Using the Konqueror Web browser/file manager.....	50
Managing the KDE desktop.....	53
Configuring the desktop.....	55
The GNOME Desktop.....	57
Using the Metacity window manager.....	60
Using the GNOME panels.....	61
Using the Nautilus file manager.....	66
3D effects with AIGLX.....	68
Changing GNOME preferences.....	71
Exiting GNOME.....	72
Configuring Your Own Desktop.....	72
Configuring X.....	73
Choosing a window manager.....	77
Choosing your personal window manager.....	80
Getting More Information.....	80
Summary.....	81
Chapter 4: Playing Music and Video	83
Playing Digital Media and Obeying the Law.....	84
Copyright protection issues.....	84
Exploring codecs.....	86
Playing Music.....	88
Using sound systems in Linux.....	88
Adjusting sound with PulseAudio.....	89
Setting up audio cards.....	90
Choosing an audio CD player.....	92
Using MIDI audio players.....	99
Performing audio file conversion and compression.....	99
Recording and Ripping Music.....	102
Creating an audio CD with cdrecord.....	103
Ripping CDs with Grip.....	104
Creating CD labels with cdlabelgen.....	106
Working with TV, Video, and Digital Imaging.....	107
Watching TV with tvtime.....	108
Video conferencing with Ekiga.....	109
Watching Movies and Video.....	111
Watching video with xine.....	112
Using Totem movie player.....	116

Using a Digital Camera	117
Displaying images in gThumb	117
Using your camera as a storage device	118
Summary	119
Chapter 5: Working with Words and Images	121
Desktop Publishing in Linux	122
Using text editors and notepads	122
Using word processors	122
Transitioning documents from Windows	129
Building structured documents	132
Doing page layout with Scribus	136
Working with Graphics	138
Manipulating images with The GIMP	138
Creating vector graphic images with Inkscape	141
Acquiring screen captures	143
Viewing images	144
Displaying PDF and PostScript Documents	145
Using the ghostscript and gv commands	146
Using Adobe Reader	146
Using Scanners with SANE	148
Web Publishing	148
Summary	150
Chapter 6: E-Mailing and Web Browsing	151
Using E-Mail	151
Choosing an e-mail client	151
Getting here from Windows	153
Getting started with e-mail	154
Tuning up e-mail	156
Reading e-mail with Thunderbird	156
Managing e-mail in Evolution	163
Reading e-mail with SeaMonkey Mail	166
Working with text-based e-mail readers	167
Choosing a Web Browser	169
Exploring the SeaMonkey Suite	170
Using Firefox	171
Setting up Firefox	173
Securing Firefox	177
Tips for using Firefox	179
Using Firefox controls	179
Improving Firefox browsing	180
Doing cool things with Firefox	181
Using Text-Based Web Browsers	182
Summary	184

Chapter 7: Gaming with Linux	185
Jumping into Linux Gaming.....	185
Overview of Linux Gaming.....	187
Basic Linux Gaming Information	188
Choosing Gaming Hardware for Linux	190
Running Open Source Linux Games.....	191
GNOME games.....	192
KDE games	193
Games in Fedora.....	194
Commercial Linux Games.....	201
Getting started with commercial games in Linux.....	202
Playing commercial Linux games	203
id Software games.....	203
Playing TransGaming and Cedega games	205
Loki Software game demos	207
Summary.....	210

Part III: Learning System Administration Skills	211
--	------------

Chapter 8: Installing Linux	213
--	------------

Choosing a Linux Distribution.....	214
Linux at work	214
Other distributions.....	215
Getting Your Own Linux Distribution.....	215
Finding another Linux distribution.....	216
Understanding what you need.....	216
Downloading the distribution	217
Burning the distribution to CD.....	218
Exploring Common Installation Topics.....	219
Knowing your computer hardware	219
Upgrading or installing from scratch.....	221
Dual booting and virtualization	221
Using installation boot options.....	223
Partitioning hard drives.....	224
Using LILO or GRUB boot loaders.....	232
Configuring networking	242
Configuring other administrative features.....	243
Installing from the <i>Linux Bible</i> CD or DVD.....	243
Summary.....	244

Chapter 9: Running Commands from the Shell	245
---	------------

Starting a Shell	246
Using the shell prompt	246
Using a terminal window	247

Using virtual terminals.....	248
Choosing Your Shell	248
Using bash (and earlier sh) shells.....	249
Using tcsh (and earlier csh) shells.....	250
Using ash	250
Using ksh.....	250
Using zsh	250
Exploring the Shell.....	251
Checking your login session	251
Checking directories and permissions.....	252
Checking system activity	254
Exiting the shell.....	255
Using the Shell in Linux.....	255
Locating commands	256
Rerunning commands	259
Connecting and expanding commands	265
Creating Your Shell Environment	268
Configuring your shell.....	268
Using shell environment variables.....	272
Managing background and foreground processes.....	275
Working with the Linux File System	277
Creating files and directories.....	280
Moving, copying, and deleting files	287
Using the vi Text Editor.....	287
Starting with vi.....	288
Moving around the file	291
Searching for text.....	291
Using numbers with commands.....	292
Summary.....	293
Chapter 10: Learning Basic Administration	295
Graphical Administration Tools	296
Using Web-based administration	296
Graphical administration with different distributions	298
Using the root Login.....	302
Becoming root from the shell (su command).....	303
Allowing limited administrative access	304
Exploring Administrative Commands, Configuration Files, and Log Files	304
Administrative commands.....	305
Administrative configuration files	306
Administrative log files.....	310
Using sudo and Other Administrative Logins	310
Administering Your Linux System.....	313
Creating User Accounts.....	314
Adding users with useradd	314
Setting user defaults	317

Contents

Modifying users with usermod	319
Deleting users with userdel	320
Configuring Hardware	321
Managing removable hardware	322
Working with loadable modules	325
Managing File Systems and Disk Space	327
Mounting file systems	330
Using the mkfs command to create a file system	338
Adding a hard disk	339
Checking system space	342
Monitoring System Performance	344
Doing Remote System Administration	345
Summary	347
Chapter 11: Getting on the Internet	349
Connecting to the Network	350
Connecting via dial-up service	350
Connecting a single wired Ethernet card	351
Sharing a network connection with other computers	352
Connecting servers	354
Connecting other equipment	355
Using Ethernet Connections to the Internet	356
Configuring Ethernet during installation	357
Configuring Ethernet from the desktop	357
Using Network Configuration GUI in Fedora	358
Identifying other computers (hosts and DNS)	360
Understanding your Internet connection	362
Using Dial-Up Connections to the Internet	364
Getting information	364
Setting up dial-up PPP	365
Creating a dial-up connection with the Internet Configuration Wizard	366
Launching your PPP connection	368
Launching your PPP connection on demand	369
Checking your PPP connection	370
Checking that your modem was detected	370
Connecting to the Internet with Wireless	371
Summary	372
Chapter 12: Securing Linux	373
Linux Security Checklist	374
Finding distribution-specific security resources	377
Finding general security resources	378
Using Linux Securely	379
Using password protection	379
Choosing good passwords	379
Using a shadow password file	381

Using Log Files.....	383
The role of syslogd.....	386
Redirecting logs to a loghost with syslogd.....	386
Understanding the messages log file.....	388
Using Secure Shell Tools.....	389
Starting the ssh service.....	389
Using the ssh, sftp, and scp commands.....	390
Using ssh, scp, and sftp without passwords.....	391
Securing Linux Servers.....	392
Controlling access to services with TCP wrappers.....	392
Understanding attack techniques.....	395
Protecting against denial-of-service attacks.....	396
Protecting against distributed DoS attacks.....	399
Protecting against intrusion attacks.....	404
Securing servers with SELinux.....	407
Protecting Web servers with certificates and encryption.....	407
Using Security Tools from Linux Live CDs.....	417
Advantages of security live CDs.....	418
Using INSERT to check for rootkits.....	418
Summary.....	419

Part IV: Setting Up Linux Servers **421**

Chapter 13: Running a Linux, Apache, MySQL, and PHP (LAMP) Server 423

Components of a LAMP Server.....	424
Apache.....	424
MySQL.....	424
PHP.....	425
Setting Up Your LAMP Server.....	426
Installing Apache.....	426
Installing PHP.....	426
Installing MySQL.....	428
Operating Your LAMP Server.....	428
Editing your apache configuration files.....	429
Adding a virtual host to Apache.....	431
User content and the UserDir setting.....	433
Installing a Web application: Coppermine Photo Gallery.....	433
Troubleshooting.....	437
Configuration errors.....	437
Access forbidden and server internal errors.....	439
Securing Your Web Traffic with SSL/TLS.....	440
Generating your keys.....	442
Configuring Apache to support SSL/TLS.....	443
Summary.....	444

Chapter 14: Running a Mail Server	445
Internet E-Mail's Inner Workings	445
About the System and the Software Used	447
Preparing Your System	447
Configuring DNS for direct delivery	448
Configuring for retrieval from a mail host	449
Installing and Configuring the Mail Server Software	450
Installing Exim and Courier	450
Installing ClamAV and SpamAssassin	452
Testing and Troubleshooting	454
Checking logs	454
Common errors (and how to fix them)	455
Configuring Mail Clients	458
Configuring Fetchmail	459
Configuring web-based mail	460
Securing Communications with SSL/TLS	460
Summary	462
Chapter 15: Running a Print Server	463
Common UNIX Printing Service	464
Setting Up Printers	465
Using Web-based CUPS administration	466
Using the Printer Configuration window	468
Working with CUPS Printing	476
Configuring the CUPS server (cupsd.conf)	476
Starting the CUPS server	477
Configuring CUPS printer options manually	478
Using Printing Commands	479
Printing with lpr	480
Listing status with lpc	480
Removing print jobs with lprm	481
Configuring Print Servers	481
Configuring a shared CUPS printer	482
Configuring a shared Samba printer	483
Summary	485
Chapter 16: Running a File Server	487
Setting Up an NFS File Server	488
Getting NFS	490
Sharing NFS file systems	490
Using NFS file systems	495
Unmounting NFS file systems	501
Other cool things to do with NFS	502
Setting Up a Samba File Server	502
Getting and installing Samba	504
Configuring Samba with SWAT	505

Working with Samba files and commands	515
Using Samba shared directories	518
Troubleshooting your Samba server.....	519
Summary.....	522

Part V: Choosing and Installing Different Linux Distributions **523**

Chapter 17: Running Ubuntu Linux 525

Overview of Ubuntu.....	526
Ubuntu releases	526
Ubuntu installer	527
Ubuntu as a desktop	528
Ubuntu as a server	528
Ubuntu spin-offs.....	530
Challenges facing Ubuntu.....	531
Installing Ubuntu	532
Getting Started with Ubuntu	537
Trying out the desktop	538
Adding more software.....	539
Getting More Information about Ubuntu	542
Summary.....	543

Chapter 18: Running Fedora and Red Hat Enterprise Linux 545

Digging into Features	547
Red Hat installer (Anaconda).....	547
Custom spins, install sets, and Live CDs	548
RPM Package Management	549
Latest desktop technology	549
System configuration tools.....	551
Going Forward with Fedora	551
Growing community support for Fedora	552
Joining Fedora special interest groups	552
Forums and mailing lists	553
Fedora Comes of Age.....	553
Installing Fedora	556
Choosing computer hardware.....	556
Choosing an installation method.....	557
Choosing to install or upgrade.....	558
Beginning the installation.....	559
Running the Fedora Firstboot.....	567
Adding cool stuff to your Fedora desktop.....	567
Summary.....	567

Chapter 19: Running Debian GNU/Linux	569
Inside Debian GNU/Linux	570
Debian packages	570
Debian package management tools	571
Debian releases	573
Getting Help with Debian	573
Installing Debian GNU/Linux	574
Hardware requirements and installation planning	574
Running the installer	575
Managing Your Debian System	580
Configuring network connections	580
Package management using APT	583
Package management using dpkg	587
Installing package sets (tasks) with tasksel	589
Alternatives, diversions, and stat overrides	590
Managing package configuration with debconf	592
Summary	592
Chapter 20: Running SUSE and openSUSE Linux	593
Understanding SUSE Linux Enterprise and openSUSE	595
What's in SUSE Distributions?	595
Installation and configuration with YaST	596
RPM package management	599
Automated software updates	600
Managing software with zypper	600
Getting Support for SUSE Linux Enterprise and openSUSE	601
Installing openSUSE	601
Before you begin	602
Starting installation	603
Starting with openSUSE	605
Summary	605
Chapter 21: Running KNOPPIX	607
KNOPPIX Features	608
Understanding KNOPPIX	608
Looking inside KNOPPIX	608
What's cool about KNOPPIX	610
Examining challenges with KNOPPIX	611
Seeing where KNOPPIX comes from	612
Exploring uses for KNOPPIX	613
Starting KNOPPIX	614
Getting a computer	614
Booting KNOPPIX	615
Correcting boot problems	615

Using KNOPPIX	620
Getting on the network.....	624
Installing software in KNOPPIX.....	625
Summary.....	626
Chapter 22: Running Yellow Dog Linux	627
Understanding Yellow Dog Linux.....	628
Going Forward with Yellow Dog	629
Digging into Yellow Dog.....	629
Installing Yellow Dog Linux	631
Hardware support.....	632
Installing Yellow Dog Linux on a PowerStation	633
Updating Yellow Dog Linux	635
Support Options.....	637
Summary.....	637
Chapter 23: Running Gentoo Linux	639
Understanding Gentoo	640
Gentoo's open source spirit.....	640
The Gentoo community.....	641
Building, tuning, and tweaking Linux	641
Where Gentoo is used	643
What's in Gentoo.....	643
Managing software with Portage.....	644
Finding software packages.....	644
Gentoo features	645
Installing Gentoo.....	646
Getting Gentoo	646
Starting Gentoo installation from a live CD.....	647
Starting Gentoo installation from a minimal CD.....	650
Getting software with emerge.....	658
Summary.....	659
Chapter 24: Running Slackware Linux	661
Getting into Slackware	661
Characterizing the Slackware Community.....	663
The Slackware creator.....	663
Slackware users	665
Slackware Internet sites	665
Challenges of Using Slackware	666
Using Slackware as a Development Platform	667
Installing Slackware	667
Getting Slackware.....	667
New features in Slackware 13.....	668

Contents

Hardware requirements	668
Starting installation	669
Starting with Slackware.....	675
Summary.....	677
Chapter 25: Running PCLinuxOS	679
Starting with PCLinuxOS.....	680
Checking what you can do	680
Adding more applications.....	681
Installing PCLinuxOS	683
Starting the install	683
Configuring after installation	685
Remastering PCLinuxOS.....	685
Summary.....	688
Chapter 26: Running Mandriva	689
Mandriva Features.....	689
Exploring Mandriva	691
Mandriva installer (DrakX).....	692
RPM package management with RPMDrake.....	693
Mandriva Linux Control Center	694
The Mandriva Community.....	695
Installing Mandriva Limited Edition	696
The right hardware for Mandriva.....	696
Installing Mandriva with the DrakX installer.....	697
Summary.....	701
Chapter 27: Running a Linux Firewall Router	703
Understanding Firewalls	704
Protecting Desktops with Firewalls	705
Starting your firewall in Fedora	705
Configuring a firewall in Mandriva	707
Using Firewalls with iptables.....	709
Starting with iptables.....	709
Using iptables to do SNAT or IP Masquerading.....	715
Adding modules with iptables	716
Using iptables as a transparent proxy	716
Using iptables for port forwarding.....	717
Making a Coyote Linux Bootable Floppy Firewall	718
Creating a Coyote Linux firewall	718
Building the Coyote Linux floppy	719
Running the Coyote Linux floppy firewall.....	725
Managing the Coyote Linux floppy firewall.....	726
Using Other Firewall Distributions	728
Summary.....	729
